

# Legal notice

This website uses cookies in order to track a user's interaction with the website, anonymously. By using this website, visitors agree to the placement of cookies on their computer in accordance with the terms of this policy.

## About cookies

Most websites use cookies in order to improve the visitor's user experience. They enable websites to "remember" visitors – either for the duration of their visit (using a "session cookie") or for repeat visits (using a "persistent cookie"). It is possible to block some or all cookies or even delete cookies which have already been set, but in that case, some functions might be lost. To do this, you need to alter your browser privacy settings.

## What is a cookie?

A cookie is a simple text file stored on your computer or mobile device by a website's server. That server will subsequently be able to retrieve or read the contents of that cookie. Cookies are managed by your browser. Each cookie is unique and contains some anonymous information such as a unique identifier, site name, digits, and letters. It allows a website to remember your browsing preferences.

## Why do we need cookies?

Cookies can have a host of different functions. They let you navigate between pages efficiently, storing your preferences and generally improving your experience of a website. Cookies make the interaction between you and the website faster and easier. If a website does not use cookies, it will think you are a new visitor every time you move to a new page on the site – for example, when you close a menu and move to another page, it will not remember that you have closed the menu on the previous page, and it will display the next page with that page's menu open.

Some websites will also use cookies to enable them to target their advertising or marketing messages based, for example, on your location and/or browsing habits.

Cookies may be set by the website which you are visiting («first party cookies») or they may be set by other websites which run content on the page you are viewing («third party cookies»).
